

Business & Technical Training College

“Put your FUTURE in GOOD Hands”

BTT will work with every student to develop their skills, to make them job ready. BTT classes are small therefore you will receive more personalized attention from the instructor.

Network + Certification Training

Student will first learn the fundamentals of networking. Then our Instructor, will demonstrate how to install, configure and troubleshoot basic networking hardware, protocols and services so you can administer a network.

Not only will you learn the features and functions of networking components, you will gain the skills and confidence to pass the CompTIA Network+ exam N10-004.

If you're an aspiring network support professional or want to jumpstart your existing networking or IT career; your Network+ training course will take your networking knowledge and ability to the next level!
