

Business & Technical Training College

“Put your FUTURE in GOOD Hands”

BTT will work with every student to develop their skills, to make them job ready. BTT classes are small therefore you will receive more personalized attention from the instructor.

Security + Certification Training

Employees unknowingly can cause a company's computer network to be at risk. CompTIA Security+ Certification is recognized by the technology community as a valuable credential that proves competency with information and data security. IT managers are always concern about network security, therefore, the demands for secure networks are growing and Security+ Certification is quickly becoming the standard.

At completion of this training students will be able to identify security risks and network vulnerabilities. Students will be also be prepared for CompTIA certification, exam #SY0-201.
